

# Ribbon Flower Tutorial

## Supplies Needed:

Ribbon  
Buttons  
Needle  
Thread  
Scissors

You can use any width of ribbon, just vary the number of ribbons used to adjust for thicker or thinner ribbon.

Here, a thin ribbon was used, so we cut 8 pieces, 6 inches long. Arrange the ribbons as shown (at right) with the center overlapping. Put a small stitch or two through the center to hold them in place.

Now take the free ends and bring them into the center, as shown at right, and secure with another stitch or two to hold them in place.

Secure a button or two to the center with a stitch, and you're finished!
